

Errata Sheet for Fact Sheet 2004–3062, “Climatic Fluctuations, Drought, and Flow in the Colorado River,” by Robert H. Webb, Gregory J. McCabe, Richard Hereford, and Christopher Wilkowske

Following publication of Fact Sheet 2004-3062, “Climatic Fluctuations, Drought, and Flow in the Colorado River,” errors were found in the publication. The original publication has been withdrawn from the World Wide Web and from print, and a revised fact sheet has been issued.

- The word “basin” has been added to the title to reflect the emphasis on the basin found in the text; the corrected title is “Climatic Fluctuations, Drought, and Flow in the Colorado River Basin.”
- Figure 3, which had shown indices of global climate and annual flow volumes of the Colorado River from 1895 through 2003, has been replaced by a time series plot of the annual flow volume for the Colorado River at Lee’s Ferry, Arizona.
- Figure 4, a graph, has been deleted.
- Sections of the text have been revised.
- The words “version 2” have been added to the bottom right corner of p. 1 to further distinguish the corrected publication from that which was withdrawn.

A corrected publication, Fact Sheet 2004-3062, “Climatic Fluctuations, Drought, and Flow in the Colorado River Basin” is available on the World Wide Web at <http://water.usgs.gov/pubs/fs/2004/3062/> Printed copies are available by telephoning 1-888-ASK-USGS (1-888-275-8747) or by writing to USGS, Information Services, Box 25286, Denver CO 80225.
